NASHVILLE FEMALE ACADEMY-DR. EL-LIOTT AGAIN TO BE THE PRICIPAL - After a rest of six months, Dr. Elliorr, finding his health fully restored to its former vigor, and his mind freshened and invigorated by the quiet and relaxation of half a year, has determined to return to his old post as Principal of the Nashville Female Academy, a podistinguished credit to himself for the space of twenty-one years. On the 19th of January next-the last day of the present session -he will resume his duties as Principal, The gentleman who at present presides over duties he is called upon to discharge and has given entire satisfaction to the putrons of the school; and while his m ny friends will regret his withdrawal, all will be fully satisfied with his successor, through whose untiring energy and able management the Nashville Female Academy has become the first institution of its kind in the Southwest.

Dr. Engorr has addressed a circular to the public, and particular to his old friends and patrons, in which he says :

On the 19th of January, 1861,-Saturday the last day of the present Session -I expec to resume my former position, as Principal of this Institution. "I had no reason, I gave no reason, for retiring from my position there, at the close of the last year, but the belief, entertained alike by my friends as well as by myself, that rest, after uninterrupted toil for about thirty years, was absolutely necessary. No one then believed, certainly I did not even hope, that six, or any number of months, would restore me as I am now restored to all the fullness of health, of mind and body I ever before enjoyed. "Being now as able to work as ever.

where else should I work but at the "Old Academy?" And in these times of political trouble, when every man should be at his post doing something, what other post is nine but this?

"I expect therefore, on the day appointed, to take up my "burden of care," truly thank-I to the "Giver of all blessings" that I teel I able to do so; and with a firm and unaltered belief that the principles taught, and the practices sanctioned there, are approved in "Enough by way of introduction; now for

First. As the present Faculty of Teachers will continue, this change of Principal will not occasion any interruption either in the order of the school, or to the studies of its pupils. Hence, I hope the present popils, in both the day and boarding-chool, will continue; and of course I desire to add many more to their number. In particular, I will be gratified to meet as many as possible of the present Senior Class as organized last June, and also of the last Senior Class, as Parlor Boarders, in the "Old Academy"

Second. I expect to associate with myself some sultable person, who will have exclusive control of the "finances" of the Academy and of the members of the Boarding-house Family. This will release me from one of my most annoying duties; and one, in my orinion, not at all congenial with the duties "As the "Financiai Agent" will have nothing to do but to attend to this department, I trust it will be so conducted as

give to all entire satisfaction. "Third. I rely for su cess upon the pecu liar advantages of the Academy, as well as opon my own special florts, and the efforts of the able and well known Faculty of Teachers associated with me. An Institution so long established and so well known, with its well-enclosed yard, broad pavements, airy corridors and spacious room-; complete exemption from the danger of fire; perfect classification of its pupils, and its non-sectarian character-so notorious that a Baptist Episcopalian, Methodist, or Presbyterian ends his daughter here, perfectly satisfied ! that in no respect will offence be given to his peculiar views; and equally well satisfied that the princples of a common religion will be daily inculcated, with the unparalled health notoriously enjoyed here, must, I think, ever command from the city and the South generally, a large and intelligent pat-

The Amalgaration of Languages.—There is a grow ing tendency in this age to approcriate the most expressive words of other languages, and after a while to incorporate them into our own; thus the word Cephalic, which is from the Greek, signifying "for the head," is now becoming popularized in connection with Mr. Spalding's great Headache remedy, but it will soon be used in a more general way, and the word Cephalic will become as common as Electrotype and many others whose distinction as foreign words has been worn away by common usage until they seem that the maney large its straight and for the maney large. makes known any deviation whatever from the natural state of the brain, and viewed in this light it may be looked on as a safeguard intended to give notice of disease which might otherwise escape attention, till too late to be remedied; and its indications should never be neglected. Headaches may be classified under two names, viz: Symtomatic and Idiopathic. Symptomatic Headache is exceedingly common and is the precarsor of a great variety of diseases, among which are Apoplexy, Gout, Rheumatism and all febrile diseases. In its nervous form it is sympathetic of diseases. In its nervous form it is sympathetic of diseases. In its nervous form it is sympathetic of diseases. In its nervous form it is sympathetic of diseases of the stomach, constituting sick headache, of hepatic disease constituting bilious headache, of worms, constipation and other disorders of the bowels, as well as renal and uterine affections. Diseases of the heart are very frequently attended with Headaches; Ansmia and plethora are also affections which frequently occasion headache. Idiopathic Headache is also very common, being usually distinguished by the name of nereous heanache, sometimes coming on suddenly in a state of apparently sound health, and prostrating at once the mental and physical energies, and in other instances it comes on slowly, heralded by depression of spirits or accrebity of temper. In most anstances the pain is in the front of the head, over one or both eyes, and sometimes provoking vomiting; under this class may also be named Neuraloia. HEADACHE is the favorite sign by which nature or both eyes, and sometimes provoking vomiting; ander this class may also be named *Neuralgia*. For the treatment of either class of Headache the Cephalic Pills have been found a sure and safe remedy elieving the most acute pains in a few minutes, and by its subtle power eradicating the diseases of which Headache is the uncoring index.

BRIDGET .- Missus wants you to send her a box of Cephalic Glue, no, a bottle of Prepared Pills,—but I'm thinking that's not just it naither; but perhaps ye'll be afther knowing what it is. Ye see she's nigh dead and gone with the Sick Headache, and wants some more of that same as relaived her before. Druggist.-You must mean Spalding's Cephalic Pills Bridget.—Och I sure now and you've sed it here's the quarther and giv me the Pills and don't be all day

Constipation or Costiveness. No one of the "many ills flesh is heir to" is so prevalent, so little understood, and so much neglected as Costiveness Often originating in carelessness, or sedentary habits; it is regarded as a slight disorder sedentary habits; it is regarded as a slight disorder of too little consequence to excite anxiety, while in reality it is the precursor and companion of many of the most fatal and dangerous diseases, and unless early eradicated it will bring the sufferer to an untimely grave. Among the lighter evils of which costiveness is the usual attendant, are Headache, Colic, Rheumatism, Foul Breath, Piles and others of like nature, while a long train of frightful diseases such as Malignant Fevers, Abcesses, Dysentary, Diarrhoa, Dyspepsia, Apoplexy, Epilepsy, Paralysis, Hysteria, Hypochondrasis, Melancholy and Insanity, first indicate

their presence in the system by this alarming symptom. Not unfrequently the diseases named origina in Constipation, but take on an independent existen nless the cause is eradicated in an early stage. TWENTY MILLIONS OF DOLLARS SAVED.—Mr. Spalding has sold two millions of bottles of his celebrated Prepared Glue, and it is estimated that each bottle saves at least ten dollars worth of broken furnitare, thus making an aggregate of twenty millions of dollars re claimed from total loss by this valuable invention claimed from total loss by this valuable invention.
Having made his glue a household word, he now proposes to do the world still greater service by curing all the aching heads with his Cephalic Pills, and if they are as good as i is Glue, Headaches will soon vanish away like snow in July.

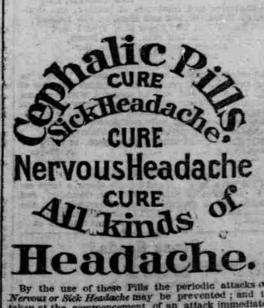

83 Over Excitement, and the mental care and anxiety incident to close attention to business or study, are among the numerous causes of Nervous Haadache. The disordered state of mind and body incident to this ressing complaint is a fatal blow to all energy and obtion. Sufferers by this disorder can always obtain speedy relief from these distressing attacks by using one of the Cephalic Pills whenever the symptoms appear. It quiets the overtasked brain, and soothes the strained and jarring nerves, and relaxes the tension of the stomach which always accompanies and agravates the disordered condition of the brain.

FACT WORTH KNOWING.—Spalding's Cephalic Pills are a certain cure for Sick Headache, Billous Headache Nervous Headache, Costiveness and General Debility

all the great medical discoveries of this age may be considered the system of vaccination for protection from Small Pox, the Cophalic Pill for relief of Head-ache, and the use of Quinine for the prevention of Fevers, either of which is a sure specific, whose benefits will be experienced by suffering humanity long after

their discoverers are forgotten.

Dip you ever have the Sick Headache? Do you remember the throbbing temples, the fevered brow, the loathing and disgust at the sight of food. How totally unfit you were for pleasure, conversation or study. One of the Cephalic Pills would have delivered you from all the suffering which you then experienced. For this and other purposes you should always have a box of them on hand to use as occasion requires.

They act gently upon the bowers,—removing toxice.

For Literary Men, Students, Delicate Females, and all persons of redentary habits, they are valuable as a Lazative, improving the appetile, giving tone and vigor to the digestive organs, and restoring the natural clasticity and strength of the whole system.

The CEPHALIP PILIS are the result of long investigation and carefully conducted experiments, having been in use many years, during which time they have prevented and relieved a vast amount of pain and suffering from Headlache, whether originating in the nervous system or from a deranged state of the riomach. They are entirely vegetable in their comp sition, and may be taken at all times with perfect safety without making any change of diet, and the absence of any dimerceable taste renders it easy to administer them to chaldren.
